MULTI-BAR TREAD

TRACTION WITHOUT THE CHATTER

Built for extreme-duty use, these tracks combine enhanced traction, improved flotation, and reduced vibration to deliver superior performance and a smoother ride. Premium rubber construction ensures long-lasting durability, while turf-friendly design leaves only a light footprint.

From paved surfaces to snow removal, these tracks deliver versatile performance where it matters most.

DIRT, TURF, MUD, RIP-RAP, PAVEMENT, SNOW

MULTI-BAR TREAD

TRACTION WITHOUT THE CHATTER

Available Sizes

320 x 86

400 x 86

450 x 86

Bar Architecture & Pattern Layout

- Bars function as discreet tread elements
- Pattern spacing preserves bar definition
- Layout maintains consistent tread geometry

Key Design Characteristics

- Consistent bar-to-ground contact
- Reduced gaps between tread elements
- Stable footprint during turns & travel

How This Affects Operation

- Predictable forward movement
- Reduced harshness during travel
- Controlled response when pushing or grading
