# M-SERIES **VS.** STANDARD PLUS

Two dependable options. One built for tougher demands.

M-Series adds upgraded bite, smoother edge protection, and balanced wear for heavier machine applications, while Standard Plus delivers reliable everyday performance.

## M-SERIES

For heavier machine applications

- Thicker guaged, extra steel cord construction
- Anti-cut edge technology
- Advanced rubber compound
- Premium-grade lug design
- High stability performance

## STANDARD PLUS

For everyday applications

- Standard steel cord construction
- Standard edge profile
- Durable rubber compound
- Standard lug design
- Stable handling
